

Title:

Student Performance Analysis Using Excel

Objective:

The objective of this project is to analyse student performance in Mathematics, Science, and English using Microsoft Excel.

Tools Used:

- Microsoft Excel
- Charts and Graphs
- Excel Formulas

Average Scores:

- Mathematics: 78.5
- Science: 78.0
- English: 81.7

Highest Scores:

Mathematics: 95

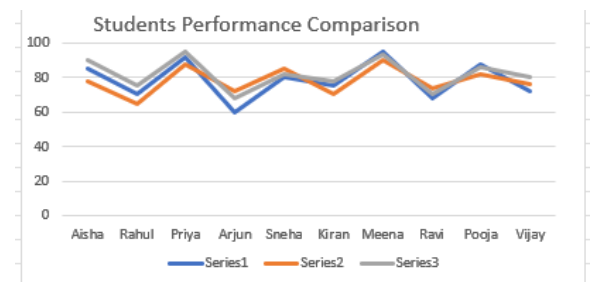

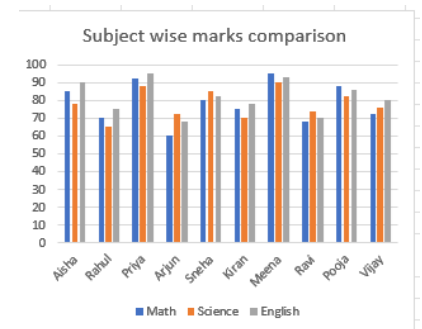

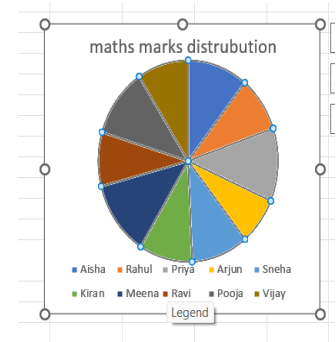

- Science: 90
- English: 95

Lowest Scores:

- Mathematics: 60
- Science: 65
- English: 68

Observations:

- English has the highest average score.
- The highest Mathematics score is 95.
- The highest Science score is 90.
- The highest English score is 95.
- Student performance is generally consistent.

Conclusion:

The analysis shows that English has the highest average score among the three subjects. Excel was used to perform data analysis and create visualizations effectively.
